Derbyshire Trusted Befriending Network

The Derbyshire Trusted Befriending Network was established in 2012 as part of Derbyshire County Council's Adult Care Prevention Strategy. Following a tendering process, South Derbyshire CVS was chosen as the strategic delivery partner and since that time has managed the project. The aim of the Network is to ensure that: **'every adult who needs befriending support has fair and equal access to it and that those who use befriending services can be confident that the service they receive is safe and well run.'**

The objectives of the Derbyshire Trusted Befriending Network are to:

- Provide a support mechanism for befriending providers across Derbyshire to include improved networking, peer support, and training & development; and help befriending providers with funding bids and other income streams including the pooling of resources, and sharing of information;
- Increase the membership and support members to achieve the Derbyshire Trusted Befriending Network Quality Mark;
- Promote Derbyshire Trusted Befriending Network and raise the profile of befriending services across Derbyshire targeting users (and potential users) of the service, volunteers, and health and social care staff;
- Recruit, train and support a network of community based befriending champions across the county;
- Advertise, promote, administer and monitor befriending champion micro-grants through local communities and appropriate service providers, aiming to build natural communities of people, away from services, that help combat loneliness and social isolation;
- Encourage and establish an outcomes-focused approach to monitoring across befriending provision to enable services to demonstrate the impact their services have on clients' lives and;
- Refer potential clients on to befriending providers as a result of their 'first contact' assessment.

Befriending can be defined as:

"a voluntary, mutually beneficial and purposeful relationship in which an individual gives time to support another to enable them to make changes in their life"¹.

A volunteer is someone other than a family member or friend, and the relationship is usually set up and supported by a group or organisation. There are a number of types of Befriending, including: Home visiting, Buddying, Mentoring, Telephone, Email, Supported friendships, and Group befriending (see page 3 for more information).

DTBN Quality Mark and this Directory

The Derbyshire Trusted Befriending Network Quality Mark for Befriending Providers has been developed so that people using local befriending services can be confident that they are safe and well-run. There are two ways that befriending services in Derbyshire can gain the Quality Mark :

1. Derbyshire Trusted Befriending Network 'Quality Standard' (QS)

This is open to befriending services in Derbyshire who can demonstrate that they meet good practice requirements.

2. NCVO Mentoring and Befriending's 'Approved Provider Standard' (APS)

This is a nationally recognised quality standard, accredited by the National Council for Voluntary Organisations.

The purpose of the Derbyshire Trusted Befriending Quality Mark is to provide robust evidence that befriending services are managed effectively, have policies and practices in place which ensure the safety and wellbeing of both volunteers and clients, and are continuously reflecting on and improving the way that they operate. Befriending service providers need to compile a portfolio of evidence which demonstrates that they meet eight 'Quality Objectives', which cover:

- **Structures, policies and practices** - in place to ensure the befriending service is consistently and effectively run, for example copies of policies, guidelines, templates, forms or checklists, action plans
- Evidence that these structures, policies and practices are **applied in the day to day running of the service**, for example completed records, forms, attendance records, minutes or notes of meetings, monitoring reports.

What information is included in this Directory?

There have been a number of changes to the Directory since the previous version produced in 2016. We have striven to encourage and support befriending service providers to either gain accreditation through the NCVO Approved Provider Standard (APS) or complete the DTBN Quality Standard (QS). All services that have met the NCVO APS or DTBN QS have achieved the DTBN Quality Mark and appear in this Directory as 'Accredited'. Some services that decided not to apply for the APS have started the process of accreditation through the DTBN QS but haven't been able to complete in time for the publication of this Directory – however, rather than omit them they have been included as 'Actively Working Towards Accreditation' as we are supporting them to meet the DTBN QS. All services listed in this Directory are able to use the DTBN Quality Mark.

The table on pages 4-5 give an overview of services available in each district of Derbyshire. Befriending services are then listed then in A-Z order by organisation name (pages 6-13).

'Accredited' service entries are those in the outlined boxes - services not in boxes are 'Active Working Towards Accreditation'. As well as a description of the befriending service and contact details, each entry shows:

Type of befriending service:

Indicates what kind of befriending service is offered, i.e.:

- Home visiting (befriender provides support by visiting a person in their own home)
- Buddying (the befriender supports a person to take part in activities or to access services outside their home)
- Mentoring (befriender supports a person to achieve specific goal or outcome)
- Telephone (befriending takes place over the telephone)
- Email (support is provided by email)
- Supported friendships (support for someone to make and sustain peer friendships in a supported environment, e.g. by acting as a chaperone, or by helping with practical things like arranging travel or handling money)
- Group befriending (support is provided by bringing people together in a group setting).

Befriending services may offer one, two or more of these kinds of befriending.

Offered to:

This shows who is eligible to use the service - for example, whether it is offered to any adult who is isolated or lonely, or whether it is limited to people with specific needs or circumstances.

Area/s covered:

Shows the geographical area/s which the service covers - only people living in this area can use the service.

Accreditation status:

This shows whether the befriending service listed is 'Accredited' or 'Actively Working Towards Accreditation'. An 'Accredited' service has met the DTBN QS or the NCVO APS. An 'Actively Working Towards Accreditation' service was in the process of completing the DTBN Quality Standard at the time of publication of this Directory. **All services listed are able to use the DTBN Quality Mark.**

All information was correct on the date this directory was published (shown on front cover).
